Centralize Security, Ensure Consistency Across Campuses and Manage Operational Costs

IT has become an integral part of how educational institutions deliver services and information to today's students. How do you maintain control and keep up with all the changes that impact technology? We can manage the daily maintenance of your business technology needs and supplement your existing IT team with whatever they need - knowledge or manpower.

We can partner with your team to:

- Keep your systems and applications operational at all times
- Consolidate infrastructure
- Maintain and centralize network security
- Add remote management for multiple locations
- Keep your systems and technology up to date
- Develop more efficient technology workflows and processes
- Provide an alternative to or enhance your existing IT staff
- Ensure consistency at all campuses

Complete, Cost Saving Solution

Saving money is a MAJOR benefit of outsourcing your technology to a specialized provider. A slow network and/or downtime can be a major expense for networks. Administrators, students and staff rely on networks for their productivity—making network outages costly events.

Consider these yearly expenses for a 100 User Network:

1. Salary for 2 Engineers (1 Sr. 1 Jr.) = \$126,600
2. Medical benefits and employment taxes = \$19,200
3. Office space and expenses = \$10,000
4. Continued education = \$5,000
5. Network security equipment and licensing = \$10,000+
6. Average yearly technology management cost = \$170,800+
7. STARS Managed IT Services will range from \$34,000-\$88,000 per year = IMMEDIATE savings!
